Description

HM Heizkoerper radiators are made of quality DC01 1.20 mm thick steel (conforms to standard EN 442), the maximum temperature of the heat carrier is - 110°C.

HM Heizkoerper radiators features:

- unique design - rounded front part of the radiator grille;
 - welded side plates - a more compact and durable radiator;
 - easily removable side grills - easier maintenance of the radiator;
 - quick and convenient installation - radiators are mounted with universal brackets and can be rotated, so it is easy to install on the side where there is a water inlet.
- Supplied with fasteners.

The power is specified at temperatures (inlet water / outlet water / room): 75°C / 65°C / 20°C.
