Description

The stove is manufactured from 100% cast iron.  
The clean glass system slows deposit buildup on the glass. An air supply above the glass creates a protective curtain. The preheated air is propelled along the glass. It triggers combustion of gas and volatile materials, thereby protecting the glass against smoke and soot deposits.  
Power modulation: 5 - 12kW, nominal power 8kW  
Heated surface 40 - 100 m².  
Maximum log length 34 cm.  
Chimney is connected at the top.
