Description

The stove is manufactured from 100% cast iron.
The clean glass system slows deposit buildup on the glass. An air supply above the glass creates a protective curtain. The preheated air is propelled along the glass. It triggers combustion of gas and volatile materials, thereby protecting the glass against smoke and soot deposits.
Power modulation: 6 - 13,5kW, nominal power 9kW
Heated surface 50 - 110 m².
Maximum log length 54 cm.
Chimney is connected at the top or rear.
