Description

The stove is manufactured from 100% cast iron. The clean glass system slows deposit buildup on the glass. An air supply above the glass creates a protective curtain. The preheated air is propelled along the glass. It triggers combustion of gas and volatile materials, thereby protecting the glass against smoke and soot deposits. Power modulation: 6 - 13,5kW, nominal power 9kW Heated surface 50 - 110 m². Maximum log length 54 cm. Chimney is connected at the top or rear.
