Gaiss/ūdens siltumsūknis Gree Versati V monobloks 8,4/8,3 kW R290, 230 V

Preces kods: GRS-CQ8.0Pd/NpG4-E
Kategorija: Siltumsūkņi > Siltumsūkņi gaiss-ūdens

CENA : 4 819,50 €

Par preci

Ražotājs: GREE electric appliances
Augstums, mm: 880
Platums, mm: 1206
Dziļums, mm: 445
Krāsa: juoda
Tips: Monoblokas
Paredzēts telpām līdz, m²: 160
Garantijas termiņš, mēn.: 24

Apraksts

(width × height × depth) – 1210 × 880 × 450 mm;**GREE Versati V R290** is an advanced, fully inverter-driven air-to-water heat pump series designed to deliver maximum efficiency, quiet operation, and high comfort throughout the year.
This system uses the natural refrigerant **R290 (propane)**, which has an exceptionally low environmental impact (GWP = 3) while maintaining high energy efficiency even at extremely low outdoor temperatures.
It is a solution designed for both new-build and renovation projects, replacing traditional boilers and ensuring significantly lower operating costs.

The **GREE Versati V 8 kW MONOBLOCK** air-to-water heat pump is a compact and highly efficient unit designed for heating medium-sized and larger homes, cooling, and domestic hot water production.
The monoblock design ensures simple and safe installation – all refrigerant circuit components are integrated into the outdoor unit.

Key Benefits:

• Extremely high efficiency – A+++;
• Stable operation even at outdoor temperatures down to –25 °C;
• Water supply temperature up to 80 °C – suitable for radiator systems;
• Natural refrigerant R290 – an environmentally friendly solution for the future;
• Fully inverter DC technology – lower energy consumption and quieter operation;
• Modular system – possibility to connect up to 6 units;
• Zone control – for different heating systems within the same building;
• Smart control via WiFi and mobile application;
• Integrated controller with a color display;
• Compatibility with solar systems and additional heat sources;
• Automatic electric heater for power balancing;
• Advanced protection features and R290 safety solutions;
• Ultra-quiet operation (~51 dB(A)).

Technology and Comfort:

• Automatic capacity control according to demand;
• Stable operation under partial-load conditions;
• Automatic defrosting without compromising comfort;
• Temperature regulation according to outdoor conditions;
• Ability to provide heating and domestic hot water simultaneously;
• Intelligent daily and weekly scheduling.
The system ensures not only high efficiency but also maximum thermal comfort without temperature fluctuations.

Technical Specifications:

• Nominal heating capacity – 8.4 kW (A7/W35);
• Heating capacity – 7.0 kW (A–7/W35);
• COP – 5.0;
• SCOP – 3.35;
• Operating range: –25 °C to +35 °C;
• Water temperature up to 80 °C;
• Single-phase power supply;
• Dimensions (width × height × depth) – 1210 × 880 × 450 mm;
• Weight – 124 kg.
